DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/21/04 has been entered.

Claim Rejections - 35 USC § 112

1. Claims 8-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, the recitation in claim 8, lines 9-10, "more flexible portion... said recesses" is seen to contain new matter, unsupported by the disclosure as originally filed since the disclosure is silent as to the "flexible" nature of the wall portion.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8-9 (assuming the claims were corrected to eliminate the new matter as pointed out above) are rejected under 35 U.S.C. 103(a) as being unpatentable over either of Watanabe or

Kanai in view of Haraguchi et al, all of record, or as unpatentable over Haraguchi et al in view of either of Watanabe or Kanai for the reasons set forth in paragraph 2) of the Office action of 6/21/04. It should be noted that the formation of the notches of Watanabe and Kanai result in a thinner walled portion between the notches and the outer wall surface of the shaft member of either of Watanabe and Kanai as claimed.
